

## Future Cars

### Introduction:

I choose this topic to know how do the cars look like in the future and how powerful are they. I have some web sites that I would evaluate them about future cars and these websites have direct and indirect information's.

I will talk first about the Volkswagen website

[http://www.carcostcanada.com/en/research\\_blvd/details.asp?sno=819&catid=5](http://www.carcostcanada.com/en/research_blvd/details.asp?sno=819&catid=5).

this website talks about some new kinds of cars about the Volkswagen and what are their prices. So this website doesn't talk about

the properties of the car it gives you the shape and the size but it have many pictures that can describe the car. The websites Author is **Jeremy Cato-Freelance journalist Article Date: 7/29/2002**. So this website is not updated so the information could be old. This website is 65-70% good because it doesn't talk all about the car properties it talks about the sells that the car would get so it doesn't have many information that is needed.

I will talk next about Ford Mustang-2005 with

[http://www.carcostcanada.com/en/research\\_blvd/details.asp?sno=862&catid=5](http://www.carcostcanada.com/en/research_blvd/details.asp?sno=862&catid=5)

This website talks about the Ford Mustang-2005 properties. It is a good website with many pictures that describes the car and shows you it's shape and size. This website shows you the cars engine and tells you how many liter in the car so it is a good website with good pictures. **Author: Trevor Hoffmann / Canadian Auto Press Article Date: 2/8/2003**. This website is 70-75% good because it talks about the cars properties and how the cars looks like.

Now i will talk about Ford GT with

<http://autos.msn.com/research/vip/futuremodel.aspx?familyid=1061&pictureid=&usage=Image&src=future>

This is not a good website because it doesn't talk about the car properties but it talks about the cars price it contain many pictures that are useful but you cannot trust it because their is not Author neither no update so you cannot trust this website. I will give it 45-50% for the pictures only not for the information.

At last **Mercedes this with**

[http://www.carcostcanada.com/en/research\\_blvd/details.asp?sno=811&catid=5](http://www.carcostcanada.com/en/research_blvd/details.asp?sno=811&catid=5)

**this website is an excellent website. It talks about the cars properties and how do the cars looks like and the power of the car it talks too about the price. It contains many useful pictures that show you the car and how does it look like. This website will get 100% because you can find any information about Mercedes cars. Author: Daimler Chrysler Media Release Article Date: 7/13/2002. Their is one problem with this website it's not up-to-date but**

you can trust it because the **Mercedes is the author.**

**Conclusion:**

**I prefer that the Mercedes website is the best because the author is the company it's self so you can trust the company because it won't give you any wrong information so this [http://www.carcostcanada.com/en/research\\_blvd/details.asp?sno=811&catid=5](http://www.carcostcanada.com/en/research_blvd/details.asp?sno=811&catid=5) is trusted.**
