

The Rainforest Effects

DONE BY: AHMED MUBARAK#182

What is the topic of my project and why I have chosen this topic?

The topic of my project is about the problem of rain forest. No one can deny that man has destroyed his environment, and cutting rainforests is one example. This problem has many bad effects on the environment, so I have chosen this topic for this reason.

Here are some web pages that are relevant to my topic:

Rainforest Effects Web Sites:

1. Methods and Effects of Topical Rainforest Deforestation
<http://jrscience.wcp.muohio.edu/FieldCourses00/PapersCostaRicaArticles/Final.MethodsandEffectsof.html>
2. Save the Amazon Rain Forests? Why?
<http://www.nevada.edu/~nburns/>
3. Rain Forests: Preserve Them? Use Them?
<http://www.gfps.k12.mt.us/pgms/eteam.html>

Sites	Rating	Evaluation overview	Useable?
Methods and Effects of Topical Rainforest Deforestation	95%	Highest marks on all criteria except the graphs, because it is not so helpful	Yes
Save the Amazon Rain Forest? Why?	93%	The date is given but out-of date	Yes
Rain Forests: Preserve Them? Use Them?	58%	It is not good because of many mistakes	Possible

Conclusion

The page that seemed most relevant to my project is “Methods and Effects of Topical Rainforest Deforestation”. I gave this site a 95 rating. I try to use different sites and deferent levels, but as you see I didn’t found so the first and second sites are approximately same in the level. It is a good project for the computer.
